

# PROJECT THETA

**Universitat**  
de les Illes Balears

2022

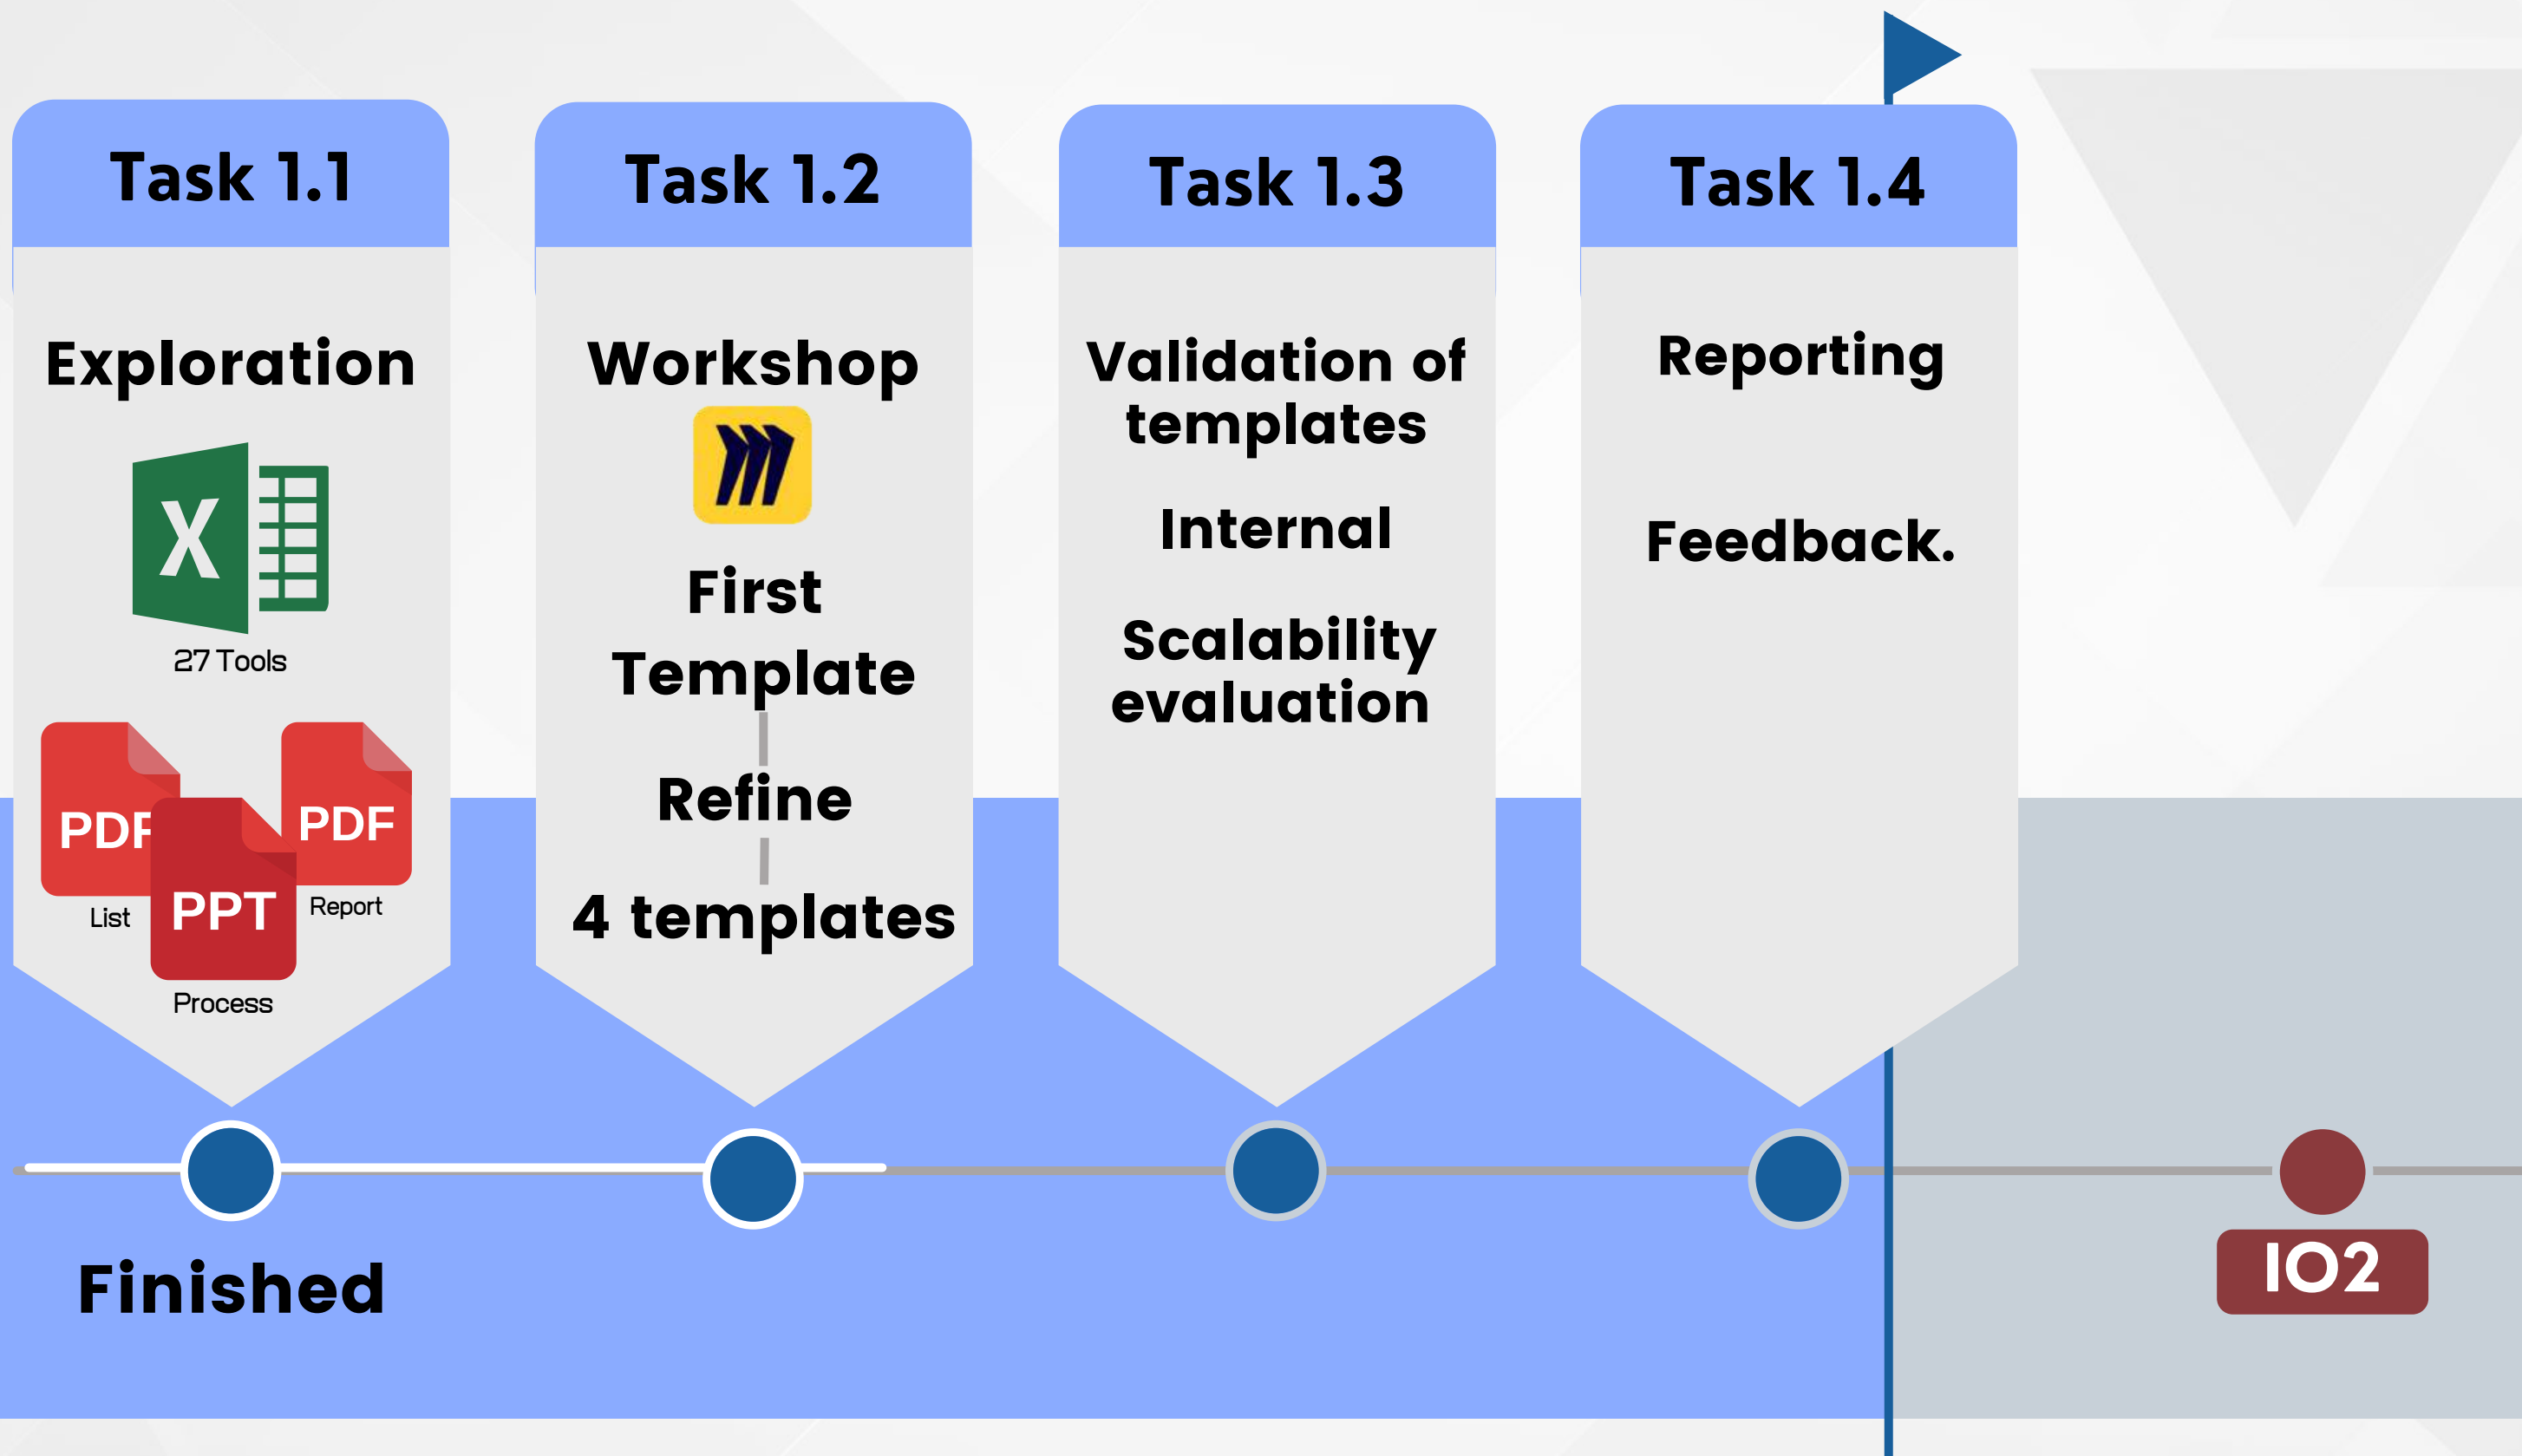

# PLANNING

Please describe the division of work, the tasks leading to the production of the result and the applied methodology

particularly suitable for XR development **Task 1.1:** Evaluation of state of the art of XR, adaptation to education and particularly to Hospitality education and industry. Factors to consider: openness, quality, accessibility and scalability. (led by UIB, all participate) - Research design is the plan and structure of investigation so conceived as to obtain answers to the applicability of XR to e-learning. **Task 1.2:** Development of an XR meta-model for education. - Definition of the construction of templates for Digital Learning Spaces that can be instantiated to define templates of typical spaces in Hotels and Hospitality environments, e.g., front desk, lobby, rooms, suites, kitchen, restaurant, etc. - Determination of template examples by interviewing experts for template requirements and the use of cases from Hospitality education within the consortium. **Task 1.3:** Validation of templates. - Execution of usability tests of template examples via user quality evaluation from consortium experts. Performing research projects based on this (led by UIB, all participate). - Evaluation of scalability of the meta-model and the generation of templates for different Digital Learning Spaces styles, cultures and industries. A number of research projects will be carried to validate the design. **Task 1.4:** Reporting (Lead by UIB, all participate) - Research results will be reported in a timely, clear and concise format which serves the purpose of extending the use of XR to Higher Education Institutions, particularly in the field of Hospitality.

Project Task	Subtask	SubTask Team	Task breakdown	Condi on	Days	Result	Blending	Deliverable	Date	Days Left	Scope of re	
1.1 Evaluation of state of the art of XR, adaptation to education and particularly to Hospitality education and industry.(led by UIB, all participate) - Research design is the plan and structure of investigation so conceived as to obtain answers to the applicability of XR to e-learning.	1.1.1 Search Tech.	Carlos Juiz Belen Bermejo David Cortés Che Govender	a) Search Solution AR/VR.	OK	3	List of technologies with or without relation to the project.	Analysis of the need, based on the results.	1 PDF with: List of technologies with possible solution.	13/04/2022	Past	100%	
			b) Search Solution E-learning AR/VR.	OK	4							
			c) Write results.	OK	3							
	1.1.2 Identify features.	Carlos Juiz Belen Bermejo David Cortés Che Govender	a) Enter each technology.	OK	3	Know the characteristics of the technologies.		1 Excel with: List of technologies with characteristics and evaluation regarding the project.				
			b) Check functionality.	OK	5							
			c) Write Features.	OK	4							
	1.1.3 Depuration and Analyze.	Carlos Juiz Belen Bermejo David Cortés Che Govender	a) Debug featureless technologies.	OK	3	List of technologies applicable to the project, qualified.		1 Presentation with: Procedure, Result and Graphs.				
			b) Evaluate the resulting technologies.	OK	4							
			c) Technology analysis.	OK	4							
	1.1.4 Selection and Recommendation.	Carlos Juiz Belen Bermejo David Cortés Che Govender	a) Selection of matching solutions.	OK	3	Recommended tool/tools based on an evaluation criterion.		1 Report closing task 1.1				
			b) Recommendation of a technology.	OK	4							
			c) Socialization and feedback.	OK	10
