## Plan the Dish

Project

# THETA

## Contents

In this presentation, you will find the analysis of 26 technologies with their main characteristics.

The metaphor of cooking a dish was used for the presentation.

1

### Knowing the ingredients

- We reviewed a set of technologies according to the scope's project and its objectives.

2

### Organize the Pantry

- We characterized and classified the founded technologies.

3

### Tasting

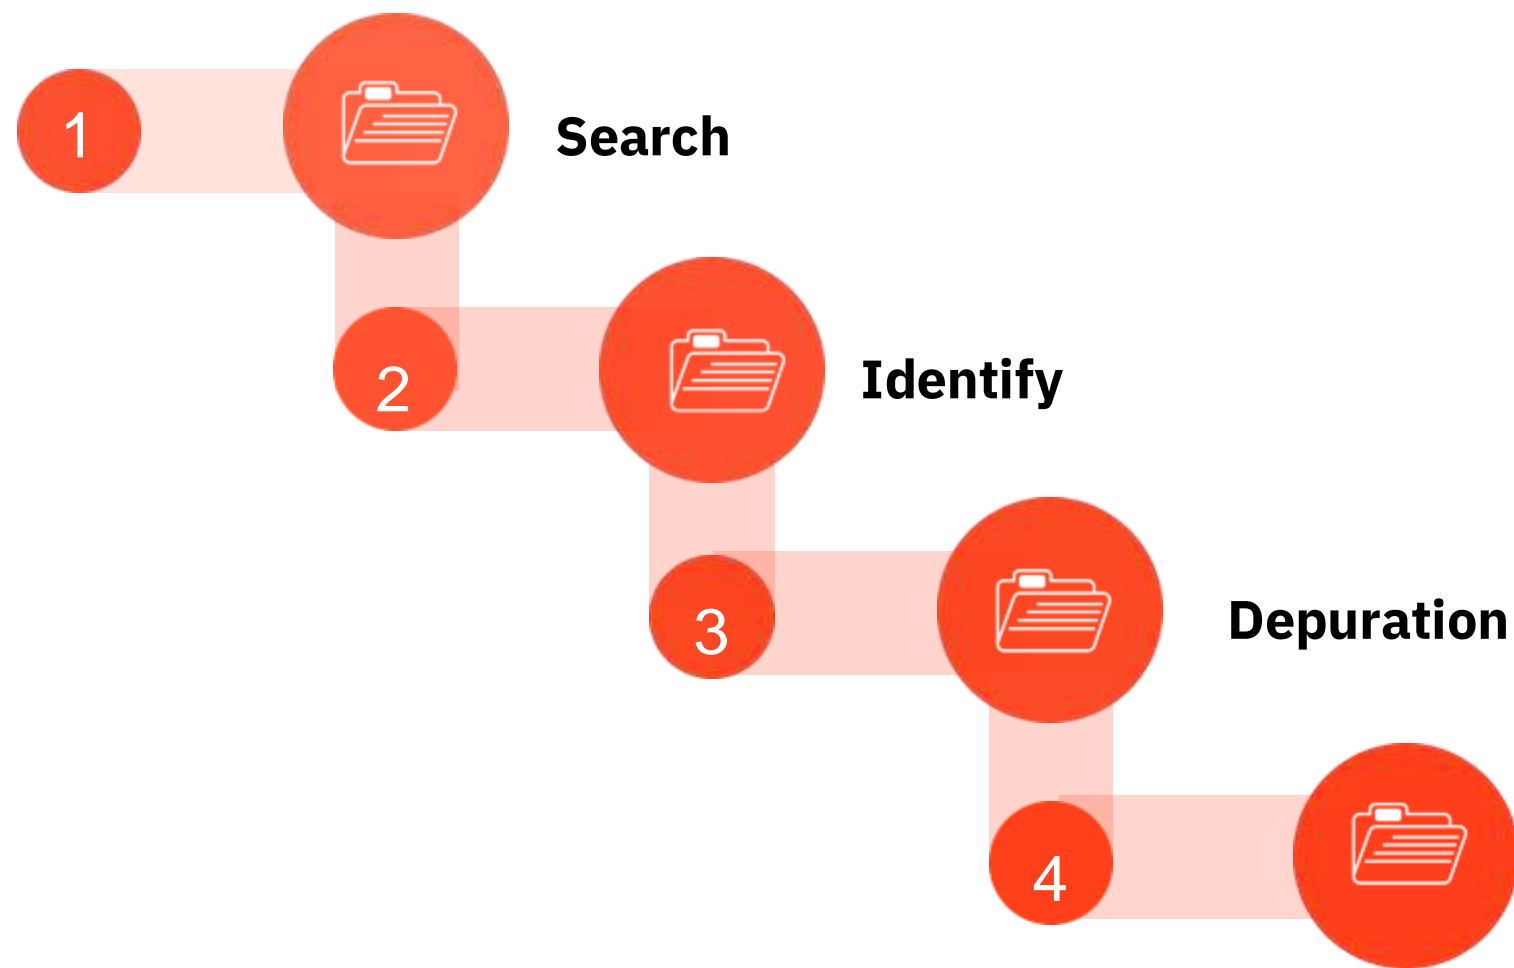

- We tested the technologies that stand out considering those are suitable to the project.

4

### Creating the Recipe

- We made a recommendation based on the analyzed characteristics.

# Tasting

	Characteristics	Description
1	Versatility	It can be adapted to multiple activities, in order to achieve multiple objectives.
2	Portability	Be compatible with multiple platforms.
3	Learning Time	Learning time in using technology.
4	Student Screening	Ability to generate evaluation among participants and observers.
5	Content Manager	Manage content, keeping AR/VR in mind

# Tasting

AR/VR editor who narrates the scene

Modular, to load AR/VR Content Management System (CMS)  
+ Multi language(idiom)+ Asset Management

Creation of collaborative space in real time. A multi-user  
room.

Modular, it allows the quick loading and creation of AR/VR  
material. With an educational approach. Multi user room.

Allows the import of code and assets. Rooms for multiple  
users and interact with each other in real time.

***Describe your VR experience and  
the editor will do the rest.***

# 4 Creating the Recipe

## ● Considering

The overall aim of THETA is to prepare students and professionals for a changing profession by offering versatile, virtual contexts for real-life case studies, using the AR/VR enabled learning spaces. These spaces, accessible through multiple platforms, in particular mobile phones

## ● We recommend
